

# DelimitView

Capitas Solutions LLC  
www.capitassolutions.com

## Introduction

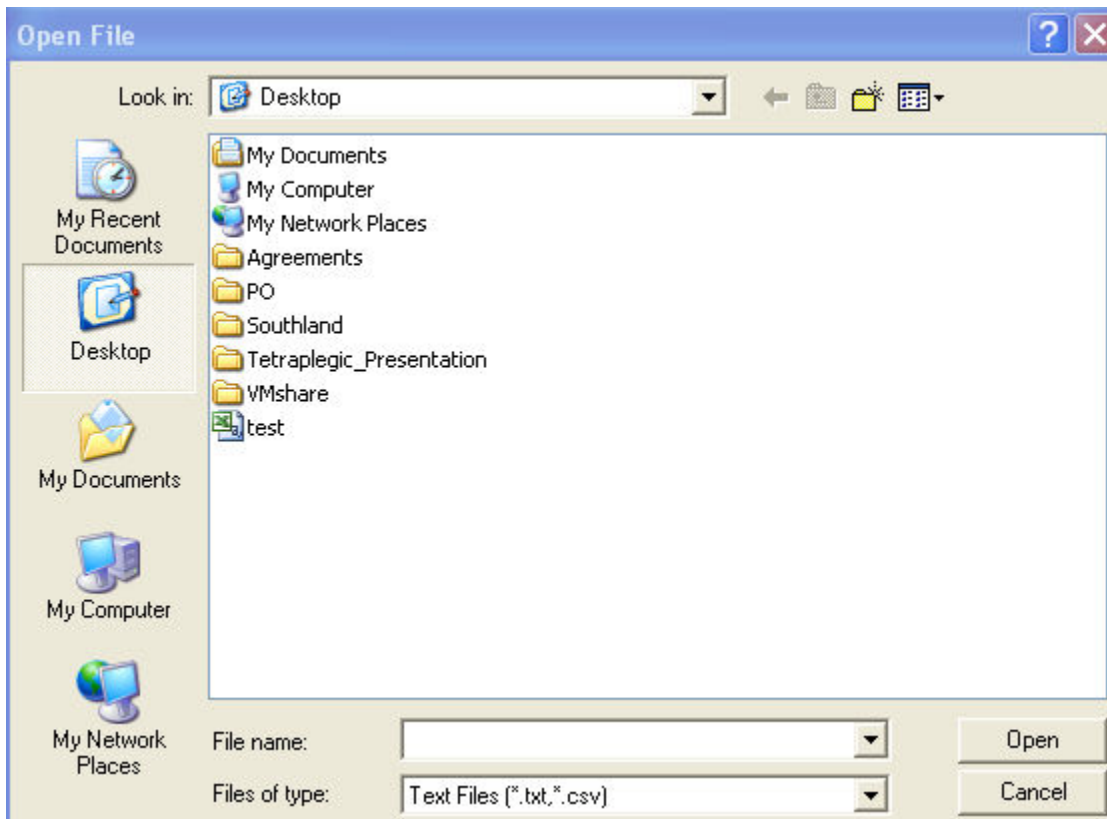

DelimitView is a simple delimited file viewing program. It is designed to be easy to use and fast. Additionally, it can handle very large files with a lot of rows and columns. DelimitView is a developer's diagnostic tool; it is not a data analysis tool. For this reason it does not include data analysis features like resorting of columns and rows. Again, the idea is speed, not features.

## Open a File

When you launch DelimitView you will see the following screen:

1. Select the appropriate delimiter for your file (i.e. bar, semicolon, or .csv)
2. If the first line of your file contains header information click "1<sup>st</sup> Line Header"
3. Click "Open File"
4. Select your file using the Open File dialog as shown below

## View the File

DelimitView will now display your data in an easy to read format. If your data extends beyond the visible window, you can scroll the x and y axis.

Edit Timestamp	Merge Timestamp	Status	Probability	Close Date	Units	Price	Amount	Creation Date	Details
2/9/2000 22:57	6/4/1999 16:11	Sales Opportunity	90	5/31/2000	800	4.78	3824	4/5/1999	Line 1 ->

## Determine Fields Length

You can double click a cell to see its length at the bottom of the screen. This will be the actual length of the field in your file, not the width of its column as shown on the screen. This feature allows you to verify fixed width fields against a specification.

Raleigh	ELLIOTT'S Department Stores	NC
Los Angeles	Trader Depot	CA
New York	Trader Depot	NY
Length of "Trader Depot" is 12		

## Numbered Columns

If you open your file without the “1<sup>st</sup> Line Header” box checked, the header will contain column numbers. This is great for checking your file against a predetermined file specification.

The screenshot shows the Capitas Solutions DelimitView application window. The title bar reads "Capitas Solutions DelimitView". The menu bar includes "Open File". The toolbar shows "Delimiter:" with radio buttons for "Bar", "Semicolon", and ".csv" (selected), and a checkbox for "1st Line Header" which is unchecked. The main area displays a table with 6 columns numbered 1 through 6. The data is as follows:

1	2	3	4	5	6	
1	Contact	City	Company	State	Zip	Record
2	Tony Passaguale	Edenvale	Sams Groceries, Inc.	NJ	7920	Chris
3	Nigel "Shan" Shanford	Atlanta	Fulton Hotels Inc.	GA	30316	Chris
