

MergeFiles

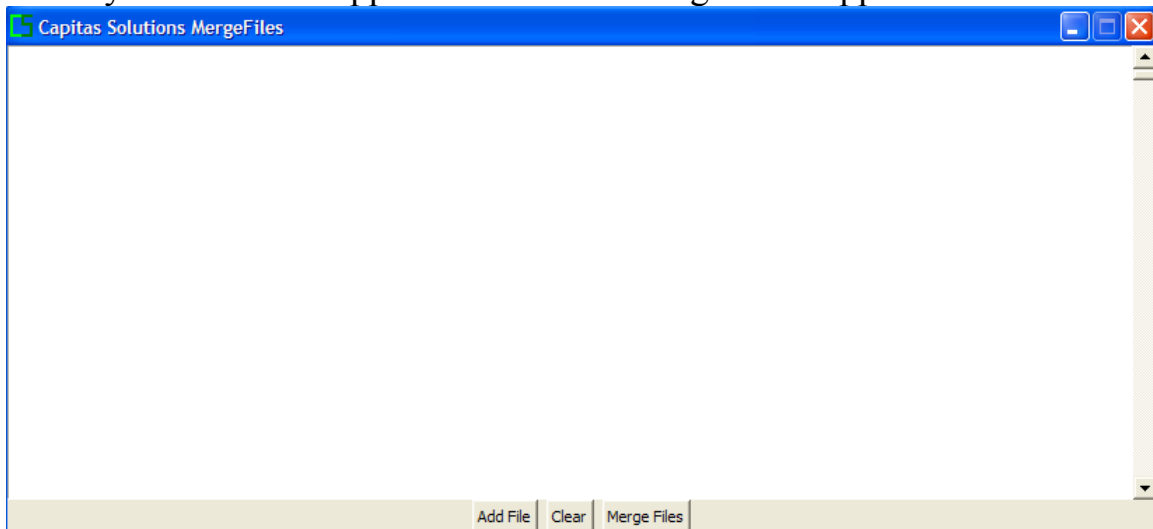

Capitas Solutions LLC
www.capitassolutions.com

Introduction

MergeFiles combines multiple text files into a single file. No need to open each file and copy/paste.

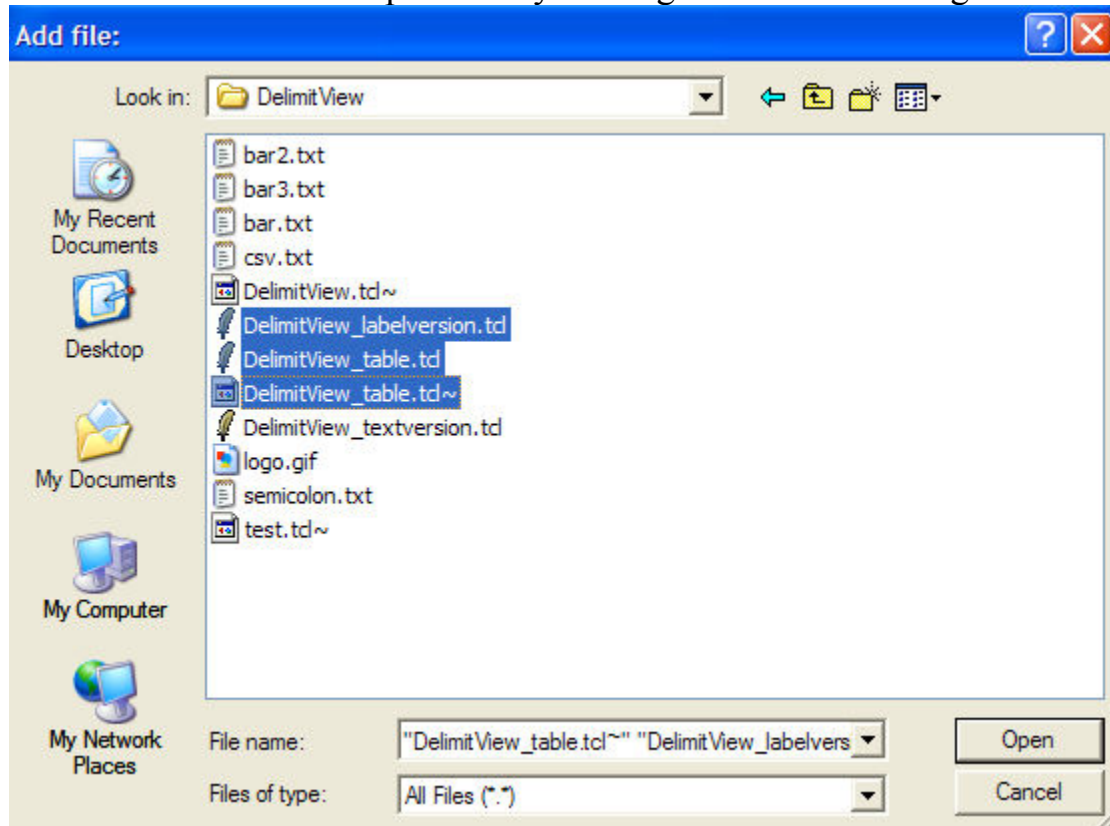

Launch Application

When you launch the application the following screen appears:

Add Files

1. Click the “Add File” button
2. Select files using the “Add File” dialog as shown below.
Hints: Select a range of cells by holding <shift> and clicking
Select multiple files by holding <ctrl> and clicking

Clear Selected Files

Click the “Clear” button

Merge Files

1. Click the “Merge Files” button
2. Specify the file to “Save To”
3. Your new file will be in the directory you specified once created
